

Forging a Common Purpose  
Between Communities and the Environment

Our mission is to promote sustainable development within Adirondack communities by building local capacity and focusing on the interconnection between economic growth, quality of life, and the preservation of the unique environment of the Adirondacks.

## Ongoing Projects

---

### Waterfront Revitalization Program

Working with the Town of Wilmington on water protection, the project will result in the revitalization of resources while creating new opportunities for business and tourism.

### Adirondack Altai Assistance Project

Sharing information and approaches to natural area protection and meeting the needs of local residents on opposite sides, but in similar areas, of the world.

### Adirondack Energy Independence

Forging a collective effort to become energy self-reliant through renewable energy, indigenous sources, innovation and conservation by the year 2020.
